

MPQC – ACCREDITED SILO SAFETY TRAINING

This course is provided by ENVEA and is designed to provide attendees with a detailed exploration of the causes of silo over-pressurisation, the risks involved, practical solutions, and much more – with experienced engineers and trainers providing hands-on demonstrations and able to answer any questions that arise.

The course is accredited by the MPQC (Mineral Products Qualifications Council). A certificate of attendance is provided to each attendee, with the option of an official MPQC certificate which is a recognised CPD document for a small additional cost (must be booked in advance). Lunch and refreshments are provided as part of an event-filled programme of learning:

ADVANCED SILO SAFETY AWARENESS – CONTENTS

The full-day advanced silo safety course gives attendees a full understanding of silo protection. The morning session includes:

- How a delivery works
- Consequences of failure
- Dynamics of delivery with regards to flow and pressure
- Interactive demonstrations
- Essential equipment required
- Overview of maintenance

After lunch, the afternoon session includes:

- Overview of maintenance procedures
- Detailed explanation of how each item works
- Detailed PRV maintenance
- Detailed filter maintenance
- Detailed service explanation
